## Pressure Pots

Designed with electroplated surfaces that prevent debris build-up and keep your operation free of contaminants, Graco pressure pots are precision welded and surfaced. The siphon tube and bottom outlet of the pressure pot allow for different feed methods, and the liners make clean up easy and mess free. They also meet our stringent internal requirements that exceed industry standards such as ASME and FM.

Pressure Pots are a crucial element of the finishing system and can be used in a variety of applications including:

### **Fluid Supply Systems for Air Spray or Feeding Other Equipment:**

They provide pulse-free, ultra-precise fluid delivery at low pressures and flow rates that are not reliably attained with pumps and other equipment. This is ideal for customers that demand reliable, affordable and easy fluid delivery.

### **Sealed Reservoir for Moisture Sensitive or Corrosive Materials:**

Store your catalyst and other moisture sensitive materials in our sealed pressure tanks to protect material consistency. Pressure tanks are ideal for supplying 2K proportioners with resin or catalyst to ensure an effective and consistent sealing surface for your finishing operation.

### **Vacuum Tank:**

When you need to remove entrapped air from material for precision mixing, Graco pressure tanks provide a great degassing option to eliminate foam from your material to reduce surface defects and pitting.

## Pressure Pots

### 2 Gallon (8 liter)

#### Pressure Pots

- ASME rated to ensure it meets factory standards
- High quality stainless steel design is compatible with many materials
- Use in stand-alone spraying, material/catalyst supply, or as a moisture sensitive material reservoir

## Agitators: Pneumatic Rotary Vane

### Mixing is step one!

If the material is not properly mixed, it will never reach optimal performance conditions despite the highest quality pumping, proportioning, and spray guns.

Graco offers a complete line of high quality mixing solutions for many different materials and containers. Our **Agitator Speed Controller** ensures that your mixing process can be controlled to eliminate paint shear, foaming, and unnecessary compressed air consumption.

Our mixing equipment will make sure you are set up for success starting with step one.

## Agitators: Pneumatic Rotary Vane

### Expanding Blade Agitators

#### Drum Agitators

- Corrosion resistant materials
- Threads into 1.5" or 2" drum bung
- Includes angled adapter reduces vortexing and allows for off center mounting
- Customize configuration by adjusting blade height or by adding additional blade assemblies
- Collapsible blades fit through drum bung and expand when spinning for efficient mixing

## Agitators: Pneumatic Rotary Vane

### Twistork® Agitators Drum Agitators

- Helix blade effectively mixes higher viscosity materials
- Mounts directly to 2 inch drum bung
- Stainless and carbon steel material options
- Siphon model allows material transfer through agitator shaft
- Sealed agitator drive prevents material contamination and evaporation
- ATEX approval for hazardous locations
- Max viscosity 10,000 cps

## Agitators: Pneumatic Rotary Vane

# Heavy Duty In-Drum Back-Geared Agitator

## Drum Agitators

- Corrosion resistant materials for high quality and long life
- Leak-free gearbox eliminates material contamination common with oil filled units
- Installs easily onto in-drum agitators
- Mounts directly to drum bung, choose 1.5 in or 2 in
- Includes 3/8 in, 7/16 in, 1/2 in, 5/8 in shaft adapters, compatible with several styles
- ATEX approval for hazardous locations

## Elevators

- Heavy duty gearbox mixes high viscosity materials
- Leak-free and oil-less gearbox prevents material contamination
- Stainless steel agitator and cover for corrosion resistance and waterborne compatibility
- Twin paddles thoroughly mix finishing materials
- Siphon option allows material transfer through agitator shaft
- Access port for easy sampling and inspection of material during operation
- Maximum viscosity 3,000 cps

## Agitators: Pneumatic Rotary Vane

# Agitator Speed Controller

## Drum Agitators

- Provides closed-loop speed control for agitators
- Maintains constant set speed even as viscosity or drum levels change
- Installs within minutes
- Prevents over-agitation of shear sensitive materials and foaming of waterborne materials
- Extends agitator lifetime by eliminating agitator over speeding
- Lowers energy costs by reducing air consumption

Part Number	Description
186517	304 SST Paddle Kit for 5, 10, 15 gallon (18.9, 38, 57 l) sizes Used to upgrade from standard composite agitator paddle to stainless steel construction, for enhanced chemical resistance.

## Agitators: Pneumatic Rotary Vane

### Drum Covers

- Integrate pumps, agitators, and accessories with drum, elevator system, and other containers
- Many mounting options and configurations
- Inspection port for clean and easy monitoring
- Stainless steel construction is compatible with catalyst, waterborne, and other finishing materials
- Create custom solutions with bare cover (238008)

Part No.	Features	Material	Manual
237746	Includes elevator 204385, air control valve 237579, floor mount base and drum cover support 237578.	Steel	<a href="#">306287</a>
204352	Includes elevator 204385 and bracket 204510.	Steel	<a href="#">306568</a>
204385	Elevator only with stationary base.	Steel	<a href="#">306287</a>
206276	Air control kit. Used with Bulldog or King pump mounted on a heavyduty elevator. Includes air regulator with gauge restrictor valve, push-pull valve, air-assist valve, hose and fitting for directing air to pump, elevator and inductor plate.		
207561	Air control kits. Elevator up/down control		<a href="#">306287</a>
237579	Air control kit similar to 206276; plus includes air tube and mounting bracket to locate push-pull control on front edge of stainless steel drum cover.		<a href="#">306287</a>
204510	Wishbone support and controls for up/down. Used with Fire-Ball, Monark, President in-line pump		<a href="#">306568</a>
237902	Bulldog, King Drum Cover Mount Includes elevator 207408, pump support 237578, and air control kit 237579.	Steel	<a href="#">306287</a>
237525	Elevator Retrofit Kit Designed to adapt elevators with old support ring to fit new SST drum covers 237306 thru 237310, 190206, 238008 and others. Drum support not included.	Steel	<a href="#">308467</a>
204490	Monark (224350) and President (224348). Includes elevator, inductor plate, pump bracket, up/down control, air hose and steel base. Requires pump adapter 161251. Also requires flange (160754).	Steel	<a href="#">306556</a>
205339	Elevator Base Plate Provides stable surface if floor is too irregular for proper operation. Use with 207408 and 204385.	Steel	<a href="#">306556</a>

## Agitators: Pneumatic Radial Piston

### Agitating is step one!

If the material is not properly agitated, it will never reach optimal performance conditions despite the highest quality pumping, proportioning, and spray guns.

Graco offers various types of high quality agitating solutions for many different materials and containers. Our **Radial Piston Air Motor** driven agitator product line is a simple, reliable and cost-effective solution for low to medium viscosity materials. Connected with Graco's **Intelligent Paint Kitchen (IPK)** package, it can be monitored and controlled to achieve optimal agitation result and eliminate paint shear, foaming, and unnecessary compressed air consumption.

Our agitating equipment will make sure you are set up for success starting with step one.

### Flange Mounted Agitators for Drum and Mix Tank

#### Drum Agitators

- Radial piston air motor
- In-line air lubrication is not required
- Agitators mount directly to mix tank or drum covers
- Dual propeller ensures efficient and thorough mixing
- Optional DataTrak for speed monitoring and overspeed alert
- Compatible with Intelligent Paint Kitchen (IPK) package for speed monitoring and control

## Electric Agitators

### Agitator Shaft and Blades

Flange-mounted and quick-clamp flange mounted agitators need shafts and blades. See below to determine the length of the shaft and the recommended impeller diameter.

Impeller Kit No.	Inside Tank Diameter "T"	Stainless Steel Impeller Diameter "D"
17N704	12" (30 cm) or less	4" (10 cm)
17N708	12" (30 cm) to 22" (56 cm)	8" (20 cm)
17N712	22" to 36" (56 to 91.5 cm)	12" (30 cm)**

Recommended impeller blade diameter is generally determined by taking the inside dimension of the tank, drum, or vessel (T in figure above) and multiplying by 0.35.

\*\*Speed is limited by material viscosity and tank diameter for 12" (30 cm) impeller.

To determine the shaft length ("A" in table below):

1. Find the distance from the bottom of the tank up 1/2 the impeller diameter (i.e., 2", 4", or 6").
2. From that point, measure to the lid mounting surface (L).
3. Add measurement in step 2 (L) to the length of the bearing housing (5" or 127 mm).

**Example:** Shaft length "A" = L + 5 inches (127 mm).

**NOTE:** Round each measurement up or down to nearest shaft length in the table below.

Shaft Part No.	Length "A" in (cm)	Part No.	Length "A" in (cm)
17P005	54 (137)	17P015	34 (86)
17P006	52 (132)	17P016	32 (81)
17P007	50 (127)	17P017	30 (76)
17P008	48 (122)	17P018	28 (71)
17P009	46 (117)	17P019	26 (66)
17P010	44 (112)	17P020	24 (61)

#### VARIABLE FREQUENCY DRIVE (VFD)

All electric agitators require a VFD. VFD type depends on input voltage and desired output voltage.

Part No.	HP	Input Voltage	Output Voltage (all 3 phase)
17N041*	1.0	120 VAC (90–132 VAC) (1 phase), 240 VAC (170–264 VAC) (1 phase), 48–62 Hz	0–230 VAC

## Air Preparation and Controls

**Air preparation is key** to controlling the finishing process and prolonging the life of finishing equipment. Graco offers a wide range of air preparation equipment to meet all of your finishing needs. Our 3 stage desiccant or membrane drying system allows you to provide dry, clean air to your entire finishing system to achieve a high quality finish.

We also have an extensive range of high quality filter-regulator-lubricators (FRLs) so clean, lubricated air reaches your pneumatic equipment at the correct pressure – regardless of system fluctuations. High quality compressed air is an important asset to any finishing operation. Ensure you are utilizing compressed air to the fullest with Graco Air Preparation Equipment.

## Air Preparation and Controls

# 3-Stage Desiccant Drying System

## Air Preparation Systems

- Ensures equipment is supplied with clean, dry air
- Multi-stage filter removes particles down to 0.01 micron
- Desiccant removes moisture from air
- Includes shut-off valve and pressure regulator
- Filter and desiccant indicators signal replacement to ensure optimal efficiency

## Pressure Regulators

Precise fluid control is crucial to any finishing process. Graco has a proven line of fluid pressure regulators to meet all of your finishing needs. Our experience provides us unique insight in to the ideal fluid pressure regulator for a wide array of finishing applications and materials.

### **Fluid Regulator**

Fluid pressure regulators control pressure of the downstream fluid, allowing operators to accurately control the pressure to guns, applicators and dispense valves. This ensures the process is stable and maintains the optimal conditions needed for a smooth paint finish, consistent extrusion or steady flow. Graco fluid regulators are designed with wear resistant materials for long life, even when using harsh materials. With decades of experience and continuous improvement, Graco has created some of the most reliable, high performance regulators in the industry.

### **Back Pressure Regulator**

Control upstream fluid pressure with Graco back pressure regulators. Our back pressure regulators use closed loop control to maintain the pressure of the system regardless of flow demand. This allows operators to trigger guns, valves, and other flow controls without changing the system pressure.

## Pressure Regulators

### Low Pressure Fluid Pressure Regulator

- Stainless steel wetted materials are compatible with catalyst and waterborne materials
- Removable adjustment key eliminates operator interference
- Manual quick flush mode ensures easy cleaning without impacting production settings
- Air operated model (214980) provides easy automation opportunities
- Low shear model (222115) uses laminar diaphragm valve to reduce material degradation and color matching issues, especially with metallic paint
- Tungsten and carbide materials ensure low wear and long life
- PTFE/Elastomer hybrid diaphragm withstands wear while maintaining accurate responsiveness

### Precision Flow

#### Fluid Pressure Regulator

- Spring-less fluid path reduces maintenance and internal material build up
- Stainless steel wetted materials are compatible with catalyst and waterborne materials
- Air operated control for easy automation integration
- High-flow bypass provides quick flushing capabilities without adjusting production settings
- Compact and lightweight design saves space and reduces payload for robot integration

## Pressure Regulators

### Low Shear High Wear Resistant Fluid Back Pressure Regulator (BPR)

- Patent-pending flow path geometry provides industry-leading low shear capability
- Ultralife series ceramic coated seat and flow director significantly increase wear resistance capability and service life
- Best in class performance in holds pressure constant while flow rate changes
- Two sizes accommodate a broad range of flow rates
- Connecting with sanitary flanges ensures easy installation and clean flushing
- Low profile, compact design and backwards compatibility mean easy installation and replacement
- Air operated models work with Intelligent Paint Kitchen (IPK) control to reduce energy consumption and paint shear

## Pressure Regulators

### Medium Pressure

#### Fluid Back Pressure Regulator (BPR)

- Medium pressure options include three pneumatic (1000 psi, 2000 psi, 3000 psi) BPRs and one mechanical (3000 psi) BPR
- Interface with the Graco's Intelligent Paint Kitchen (IPK), controlling pressure and flow without human intervention
- Offer better resolution than other brands, adjusting more accurately to keep fluid pressure at desired levels
- Locking nut feature prevents set up of mechanical BPR from loosening caused by vibration

### Fluid Restrictor Valves

#### Tamper-Resistant Valves

- Manually adjust flow settings at the gun
- Tamper resistant adjustment knob to eliminate operator interference
- Circulate materials through the valve to ensure a uniform fluid suspension and eliminate material stagnation
- Stainless steel materials are compatible with catalyst and waterborne materials

## Pressure Regulators

### Fluid Adaptors

#### Gun Fittings

- Stainless steel construction
- Quick couplers automatically seal once disconnected
- Quickly change between guns, regulators, and lines to reduce setup, changeover, and maintenance time
- Don't flush through guns tips, disconnect and flush through quick connects. Reduce flushing time and avoid premature tip wear.
- Provide flexibility for operators, especially those that own or maintain their own guns. Promote daily maintenance.
- Compatible with Graco Gun Regulators and Restrictors

## Surge Suppressors

**Surge Suppressors** are a simple and reliable way to reduce pulsation and assure smooth fluid transfer throughout your finishing system. Graco surge suppressors were designed specifically for the finishing industry from decades of pump technology research. The streamlined fluid path ensures low shear, smooth fluid flow, and superior flush ability.

## Surge Suppressors

### Active Surge Suppressors

- Work off compressed air available in most manufacturing facilities
- Active air pressure compensation eliminates the need for periodic air pressure check and recharge
- Automatic adjustment of pressure in air section eliminates the need for manual adjustment based on fluid pressure
- Improved flushability makes color changes quick and easy
- Backup seal helps prevent paint from leaking out in case of diaphragm rupture
- Mount on pump, wall, or floor
- Stainless steel and PTFE materials are compatible with many finishing materials

# High Flow Surge Suppressors

- Reduces pulsation for consistent material delivery and uniform spray pattern
- Stainless steel and PTFE materials are compatible with many finishing materials
- In-line flow configuration is easy to flush, making color changes quick and easy
- Multiple fluid connection options accommodate global system requirements
- Ideal for large, high flow rate systems

## Filters

Safe guard your process by removing contaminants from your circulation line. Graco has a high quality filter solution for a wide range of pressure and flow rates.

### Bag Filter

Bag filters are a great solution for filtering high volumes of liquid. They are simple, economical, and effective. This filter works well in conjunction with any of our high quality, high volume pumps. Graco's high capacity filters extend the time between filter changes which is ideal for large circulation systems in which downtime is not an option.

### Red Alert

Red Alert filters are a unique filtering option. The integrated Red Alert Pop Up Indicator signals the user that it is time to change the filter. This minimizes operator error and the need for check sheets or maintenance schedules. It also keeps filters from clogging and ensures your operation runs more efficiently.

### High Pressure

Graco's high pressure filter is ideal for high or low pressure finishing applications to reduce material usage during flushing to save you money. The design also resists wear and damage from even the most corrosive and abrasive materials. Whether used on a spray package, a 2K catalyst system or circulation out-feed, this versatile filter won't let you down.

## Hoses, Fittings, Swivels and Gauges

### Hoses, Fittings, Swivels and Gauges

The key to a productivity is a complete system with hoses, fittings, swivels and gauges. Our gauges, fittings and hoses have options for both air and fluids, and our material selections cater to the needs of the finishing industry. They handle tough solvents, moisture sensitive or corrosive acid catalysts. They withstand the harshest environments and minimize downtime.

## Hoses, Fittings, Swivels and Gauges

# Moisture-Lok

## Hoses

- Compatible with moisture sensitive materials
- Designed specifically to prevent moisture permeation through hose lining
- Many different sizes, lengths, pressures, and connections available
- Fully assembled, includes couplings
- Ideal for use with plural component materials

# Automatic Spray Gun Valve

## Swivels and Valves

- Automate your system with this robust pneumatically operated valve
- Mount easily to 1/2in (12.7mm) rod using built-in set screw
- Stainless steel wetted materials are compatible with catalyst, waterborne, and other finishing materials
- Easily install a wide variety of flat tips for many spraying options
- Adjustment knob for fine tuning your process

## Hoses, Fittings, Swivels and Gauges

### Fluid Gauges

#### Stainless Steel Low Pressure Fluid Gauges

- Corrosion Resistant
- 2.5 in (63 mm) diameter dial
- 1/4 in NPT(M) connection
- Bottom mount
- Shatterproof glass

Part No.	Pressure Range
187875	0-30 psi (0-2 bar)
187874	0-100 psi (0-7 bar)
187873	0-200 psi (0-14bar)
187876	0-300 psi (0-21 bar)

#### Stainless Steel High Pressure Fluid Gauges

- Corrosion Resistant
- 2.5 in (63 mm) diameter dial
- 1/4 in NPT(M) connection
- Bottom mount
- Shatterproof glass
- Liquid filled to reduce indicator pulsation

Part No.	Pressure Range
105770	0-1000 psi (0-68 bar)
102814	0-5000 psi (0-344 bar)

#### Stainless Steel High Pressure Fluid Gauges

- Corrosion Resistant
- 2.5 in (63 mm) diameter dial
- 1/4 in NPT(M) connection
- Back mount
- Shatterproof glass
- Liquid filled to reduce indicator pulsation

Part No.	Pressure Range
113641	0-3000 psi (0-207 bar)
113654	0-5000 psi (0-344 bar)

#### Stainless Steel Fluid Gauges with Dampeners

- Dampener protects gauge from severe pressure pulsation
- Corrosion Resistant
- 2.5 in (63mm) diameter dial
- 1/4 in NPT connections

Part No.	Pressure Range / Inlet
208855	0-300 psi (0-21 bar) 1/4 in NPT(M)
110182	0-2000 psi (0-140 bar) 1/4 in NPT(F)
206171	0-200 psi (0-140 bar) 1/4 in NPT(F)

### Air Gauges

#### Low Pressure Air Gauges

- Black enamel case
- Bottom mount
- 1/8 in NPT and 1/4 in NPT connections

Part No.	Pressure Range / Inlet
110436	0-100 psi (0-7 bar) 1/8 in NPT(M)
100960	0-200 psi (0-14 bar) 1/4 in NPT(M)

#### Low Pressure Air Gauges

- Black enamel case
- Back mount
- 1/8 in NPT and 1/4 in NPT connections

Part No.	Pressure Range / Inlet
108190	0-100 psi (0-7 bar) 1/8 in NPT(M)
101689	0-200 psi (0-14 bar) 1/4 in NPT(M)

## ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
