

E-VOLUTION AUTOMOTIVE NEWS

New: E-Volution Automotive Newsletter

E-Volution Automotive News, Graco's bi-monthly automotive newsletter, delivers the insights you need to optimize manufacturing and electric (EV) battery assembly to your inbox. Our June 2024 issue covers how to:

- [prevent thermal runaway with foam encapsulation](#)
- [get that new car finish without wasting paint](#)
- [control electric and pneumatic paint shops](#)

Prevent Thermal Runaway with Foam Encapsulation

Manufacturing high performance electric vehicle (EV) battery modules that remain safe requires careful attention to thermal management and foam encapsulation. As more power is packed into smaller battery cells, the more challenging foam encapsulation processes become. [Explore the challenges and how to address them.](#)

Get that 'New Car' Finish without Wasting Paint

An automaker noticed that certain colors or metallics were going flat and had to be thrown out. Graco liquid finishing experts found out why. Their unique research explains [how to get that "new car" finish without wasting paint.](#)

Control Electric and Pneumatic Paint Shops

Graco's Intelligent Paint Kitchen is a smart set of sensors, actuators and control modules that communicate with each other to optimize industrial paint supply and circulation. The system's ability to reduce downtime and cut energy costs used to be limited to paint mix rooms with electric pumps. A new pump control module has extended [cost effective control to pneumatic and/or electric factory paint mix rooms.](#)

Minimizing Risks in EV Battery Manufacturing with Advanced Dispensing Technologies

Advanced materials and new technologies are being developed faster than ever before. Find out how leading global automakers are successfully leveraging new dispense technologies and application know-how to minimize adoption risks and increase ROI in EV battery manufacturing. Get more details about this BEV TechTalk and [register now.](#)

E-Volution Starts with Graco

Whether you're gearing up to roll EVs off the assembly line, streamlining your automotive production or electrifying your factory floor, Graco is here to supply advanced, customized products and solutions that give you the confidence to spray, move, and apply your most demanding materials. Learn how we can help at graco.com/automotive.
