### Installation

Before installation of any air line components, blow out the pipe line to remove scale and other debris. Use pipe compound or tape sparingly and only on male threads.

Install the components in the pipe line so that the flow is in the direction of the arrow stamped on the body.

Locate the air line components as close as possible to the equipment served.

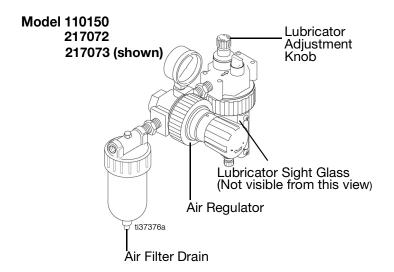

Install the air filter upstream from the regulator and the lubricator.

To provide a variety of assembly options, a bleed-type master air valve is not included with FRLs. See **Accessories**, page 13, to order. Another bleed-type master air valve can be installed upstream from the FRL to isolate it for servicing.

To reduce the risk of serious bodily injury, including skin injection, splashing fluid in the eyes or on the skin, or injury from the pump starting unexpectedly, be sure your system includes a bleed-type master air valve. Install the air valve between the FRL outlet and the device the FRL is serving. When relieving system air pressure, close the bleed-type master air valve to fully relieve air pressure.

### **Mounting Air Accessories**

Use a bracket to mount the air accessories to a wall or cart. Do not hang the accessories directly off the air motor inlet, which could be damaged from the weight and operating stress.

#### Air Filter

Clean the air filter regularly to maximize filter efficiency and to avoid excessive pressure drop. Drain contaminants from the bowl before reaching the baffle level. Open the drain to drain the bowl or fully relieve pressure and remove the bowl. Use household soap and water or denatured alcohol for cleaning. Use compressed air to blow out the filter body. Wash the filter element and blow it out from the inside. Clean the sight glass, which may attack or weaken it. If the sight glass appears damaged by the solvent, replace it immediately.

An automatic drain accessory, Part No. 106151, is available for most filters, except for Model 110146, 106148, and 106149. Part No. 127711 is available for Models 106148 and 106049. To install the drain, fully relieve system pressure, then remove the o-ring and bowl. Remove the drain from the bowl and replace it with the automatic drain. Reassemble.

### Regulator

The regulator reduces the air supply pressure to a specified, constant downstream pressure to maximize equipment performance. Preset pressures can be locked in. See manual 308167 or 308168 (supplied with the FRLs) for complete air regulator information.

#### Lubricator

The lubricator meters oil into the moving air stream to lubricate air operated motors. A manual adjustment in the housing sets the oil drip rate into the air stream, which can be monitored through a sight glass on most lubricators. One or two drops of oil a minute is a common adjustment. Use Graco motor oil, Part No. 202659. All lubricators, except Model 110148, can be refilled with the system pressurized. However, always relieve the system pressure before removing the bowl for any reason.

### **Service**

Relieve air and fluid pressure before servicing the regulator, filter, or lubricator.

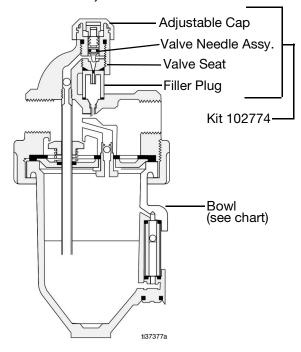

To reduce the risk of serious bodily injury, fluid injection, splashing in the eyes or skin, injury from moving parts, always open the bleed-type master air pressure and trigger the gun or dispense valve and open any fluid drain valves to relieve fluid pressure.

- 1. Disassemble the component. Refer to the illustrations on pages 4 and 5.
- Use household soap and water or denatured alcohol for cleaning. Wipe the parts clean with a clean, soft, dry rag. Use compressed air to blow dirt and contaminants out of the lubricator or filter body.
- 3. Inspect all parts for wear or damage. Replace damaged parts. Use all parts supplied with the kit.

**NOTE:** The chart identifies the available repair kits for the air filters and lubricators covered in this manual. The cutaway drawings shown on pages 6 and 7 show the contents of the kits.

### Repair Kits Lubricator Repair Kits

Lubricator 214849, 237212

### **Graco Standard Warranty**

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

#### FOR GRACO CANADA CUSTOMERS

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
