Operation - Repair - Parts

Contractor[®] PowerShot™ Spray Guns

For the application of architectural paints and coatings only. Not approved for use in explosive atmospheres or hazardous (classified) locations. For professional use only.

3300 psi (22.8 MPa, 228 bar) Maximum Working Pressure

See page 3 for model information

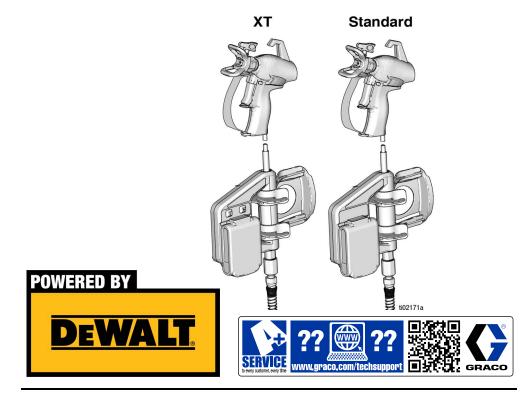

Important Safety Instructions

Read all warnings and instructions in this manual, your sprayer manual and in the battery and charger manual before using the equipment. Be familiar with the proper control and usage of the equipment. Save these instructions.

Important Medical Information

Read the medical alert card provided with the gun. It contains injection injury treatment information for a doctor. Keep it with you when operating the equipment.

PROVEN QUALITY. LEADING TECHNOLOGY.

Safety Symbols

Safety Symbols

The following safety symbols appear throughout this manual and on warning labels. Read the table below to understand what each symbol means.

Symbol	Meaning	Symbol	Meaning
4	Electrical Shock Hazard		Do Not Stop Leaks with Hand, Body, Glove or Rag
	Equipment Misuse Hazard		Eliminate Ignition Sources
	Fire and Explosion Hazard		Consult Doctor
	Skin Injection Hazard	NPa/bar/PR	Follow Pressure Relief Proce- dure
	Skin Injection Hazard		Ground Equipment
	Splash Hazard		Read Manual
	Toxic Fluid and Fumes Hazard		Ventilate Work Area
	Do Not Place Hands or Other Body Parts Near Fluid Outlet		Wear Personal Protective Equipment
	Do Not Put Hand in Front of Spray Tip		

Safety Alert Symbol

This symbol indicates: Attention! Become Alert! Look for this symbol throughout the manual to indicate important safety messages.

Warnings

Warnings

The following warnings apply throughout this manual. Read, understand, and follow the warnings before using this equipment. Failure to follow these warnings can result in serious injury.

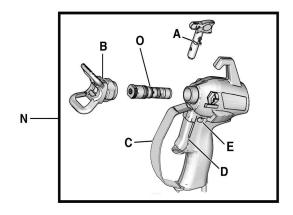

\wedge	SKIN INJECTION HAZARD
	High-pressure fluid from gun, hose leaks, or ruptured components will pierce skin. This may look like just a cut, but it is a serious injury that can result in amputation. Get immediate surgical treatment.
<u></u>	 Do not spray without tip guard and trigger guard installed.
	Engage trigger lock when not spraying.
	 Do not point gun at anyone or at any part of the body. Do not point gun at anyone or at any part of the body.
	 Do not put your hand over the Spray Tip. Do not stop or deflect leaks with your hand, body, glove, or rag.
X	• Follow the Pressure Relief Procedure and remove the battery when you stop spraying and before cleaning, checking, or servicing equipment.
	 Tighten all fluid connections before operating the equipment. Obset because discussion of the product of the produc
NPa/bar/PSI	 Check hoses and couplings daily. Replace worn or damaged parts immediately.
^	FIRE AND EXPLOSION HAZARD
	Flammable fumes, such as solvent and paint fumes, in work area can ignite or explode. Paint or solvent flowing through the equipment can cause static sparking. To help prevent fire and explosion:
	 Use equipment only in well ventilated area.
	• Eliminate all ignition sources; such as pilot lights, cigarettes, portable electric lamps, and plastic drop cloths (potential static sparking).
	 Ground all equipment in the work area. See Grounding instructions.
	Never spray or flush solvent at high pressure.
	• Keep work area free of debris, including solvent, rags and gasoline.
Ð	• Do not plug or unplug power cords, or turn power or light switches on or off when flammable fumes are present.
	Use only grounded hoses.
	 Hold gun firmly to side of grounded pail when triggering into pail. Do not use pail liners unless they are anti-static or conductive.
	 Stop operation immediately if static sparking occurs or you feel a shock. Do not use equipment until you identify and correct the problem.
	 Keep a working fire extinguisher in the work area.

Grounding

Grounding

The equipment must be grounded to reduce the risk of static sparking. Static sparking can cause fumes to ignite or explode. Grounding provides an escape wire for the electric current.

Spray Gun: ground through connection to a properly grounded fluid hose and pump.

Fluid Supply Container: follow local code.

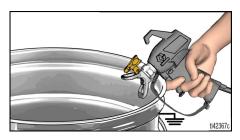

Solvent Pails Used when Flushing: follow local code. Use only conductive metal pails, placed on a grounded surface. Do not place the pail on a nonconductive surface, such as paper or cardboard, which interrupts grounding continuity.

Fluid Hose: use only electrically conductive hoses with a maximum of 500 ft. (150 m) combined hose length to ensure grounding continuity. Check electrical resistances of hoses. If total resistance to ground exceeds 29 megohms, replace hose immediately. **Ground Metal Pails:** Connect a ground wire to the pail by clamping one end to the pail and the other end to a ground such as a water pipe.

Maintain Grounding Continuity: When flushing or relieving pressure, hold a metal part of the gun firmly against the side of a grounded metal pail, then trigger the gun.

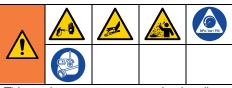

Pressure Relief Procedure

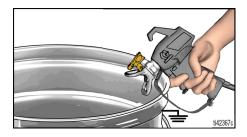

Follow the Pressure Relief Procedure whenever you see this symbol.

This equipment stays pressurized until pressure is manually relieved. To help prevent serious injury from pressurized fluid, such as skin injection or splashed fluid, follow the **Pressure Relief Procedure** whenever sprayer is stopped and before sprayer is cleaned or checked, and before equipment is serviced.

- 1. Turn sprayer OFF.
- Engage the Trigger Lock. Always engage the Trigger Lock when sprayer is stopped to prevent the gun from being triggered accidentally.
- 3. Turn pressure control knob to lowest setting.
- 4. Put drain tube into a waste pail and turn Prime/Spray valve in PRIME position (drain) to relieve pressure.
- Hold the gun firmly to a pail. Point gun into pail. Disengage the Trigger Lock and trigger the gun to relieve pressure.

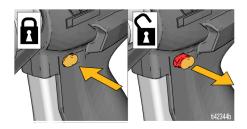

- 6. Engage the Trigger Lock.
- If you suspect the Spray Tip or hose is clogged or that pressure has not been fully relieved:
 - a. Using a wrench, VERY SLOWLY loosen the tip guard retaining nut or the hose end coupling to relieve pressure gradually.
 - b. Using a wrench, loosen the nut or coupling completely.
 - c. Clear airless hose or Spray Tip obstruction. See Clear Tip Clogs, page 17.

Gun Trigger Lock

To prevent injury when the gun is not in use, always engage the gun's Trigger Lock if unit is being shut down or left unattended.

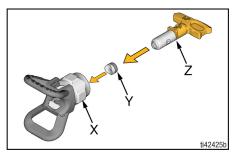

Spray Tip Installation

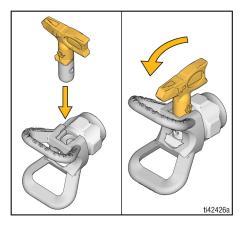

To avoid serious injury from skin injection, do not put your hand in front of the Spray Tip when installing or removing the Spray Tip and Spray Tip Guard.

To prevent Spray Tip leaks, make certain Spray Tip and Spray Tip Guard are installed properly.

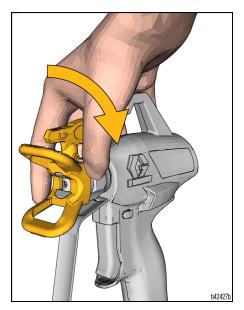

- 1. Perform **Pressure Relief Procedure**, page 9.
- 2. Remove Battery from PowerPak.
- Use Spray Tip (X) to insert OneSeal[™] (Y) into Spray Tip Guard (Z).

4. Insert Spray Tip into Spray Tip Guard.

5. Screw assembly onto Spray Gun and hand tighten.

NOTE: The PowerShot has a yellow solvent gasket at the end of the Cartridge. This allows for the use of the standard OneSeal[™] for all material applications.

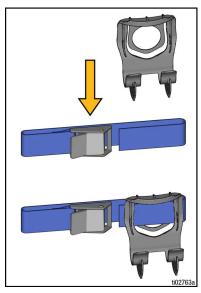

Connect Gun to Sprayer

Make sure sprayer is turned OFF and unplugged from power source. Refer to your sprayer instruction manual for priming and spray instructions.

- 1. Attach supply hose to sprayer fluid outlet.
- 2. Attach other end of supply hose to the EasyGlide Swivel. Use two wrenches (one on the PowerShot EasyGlide Swivel and one on the hose), to tighten all connections securely.
- 3. Refer to sprayer instruction manual for priming instructions.

Belt Setup

1. Install PowerShot Holster onto Belt located per the user's preference (left side, right side, or back side).

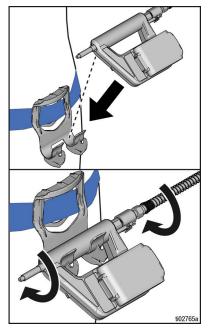

2. Attach the Belt on waist and tighten until snug. Close Belt Latch.

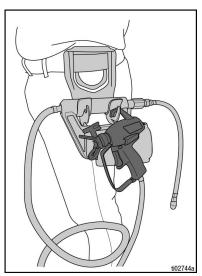

NOTE: It is recommended to tighten the Belt fairly tight to ensure the PowerPak is held securely during use.

 To attach PowerPak to the PowerShot Holster, rotate PowerPak slightly outward and slide it into the Holster. Rotate inward to lock into place.

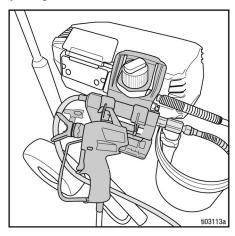

4. Spray Gun can hook on the outside of the PowerShot Holster as shown for hands-free mobility.

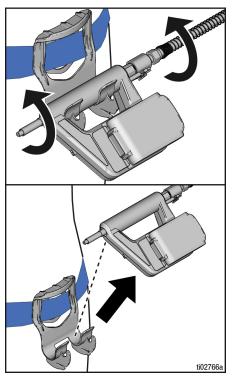

NOTE: The PowerPak can also be held by hand while spraying. See both instances below.

NOTE: The PowerPak and PowerShot gun may be stored on paint sprayer filter housing by using PowerPak Holster.

5. To remove PowerPak from the Holster, rotate PowerPak slightly outward and lift it out of the Holster.

NOTE: Extra Belt length can be cut to desired size with scissors.

NOTICE

Never pull the sprayer around by the Spray Gun. Doing so can damage or disconnect the wire connections in the Spray Gun.

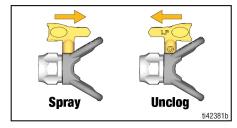

Startup

Always start with a fully charged Battery. Do not splash or immerse Battery or charger in water or solvents. See Battery and charger information shipped with the sprayer.

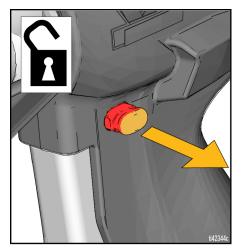

To avoid serious injury from fire and explosion, replace and charge Battery only in a well-ventilated area and away from flammable or combustible materials, including paints and solvents.

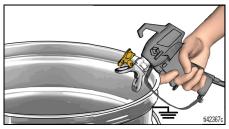

- 1. Install fully charged Battery onto PowerPak.
- 2. Turn the Spray Tip to UNCLOG position.

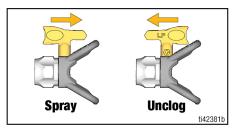

3. Disengage Trigger Lock.

- 4. Refer to sprayer instruction manual for priming instructions.
- 5. Point the Spray Gun into a waste pail and pull the Trigger until paint flows from gun.

Turn the Spray Tip forward to SPRAY position.

You are now ready to spray!

Pair Gun with Sprayer (PowerShot XT only)

For the additional features (remote pressure adjustment and SmartStall) of the Contractor PowerShot XT spray gun to function, it must be paired with a SmartDisplay XT. Only one Contractor PowerShot XT spray gun can be paired to a SmartDisplay XT at a time.

NOTE: If two spray guns are preferred, it is recommended that the SmartStall[™] feature be disabled, see Disable/Enable SmartStall[™] (PowerShot XT only), page 16.

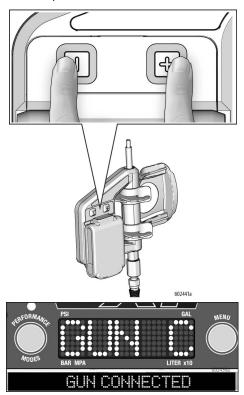

- Plug sprayer power cord into a properly grounded electrical outlet and turn ON/OFF switch to **ON** position.
- 2. Perform pressure relief procedure as outlined in the sprayer manual.
- Attach fully charged battery to Contractor PowerShot XT PowerPak System.
- Short press right menu button on SmartDisplay XT until "PAIR SPRAY GUN" begins to scroll across display.

 Press and hold right menu button until "SEARCHING" begins to scroll across display.

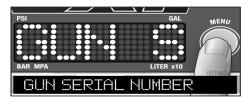

6. While "SEARCHING" is scrolling across display, press and hold both pressure adjustment buttons simultaneously on the PowerPak System until "GUN CONNECTED" scrolls across the display. Once connected, both buttons can be released and the SmartDisplay XT will return to display the current system pressure.

7. If the Contractor PowerShot XT spray gun fails to pair to the SmartDisplay XT, "GUN NOT FOUND" will scroll across the display before returning to the "PAIR SPRAY GUN" screen.

The serial number of the paired Contractor PowerShot XT spray gun can be accessed by pressing the menu button three times until the "GUN SERIAL NUMBER" text is displayed.

Remote Pressure Adjustment (PowerShot XT only)

An additional feature of SmartDisplay XT paired with a Contractor PowerShot XT spray gun is remote pressure adjustments, allowing the user to increase or decrease pressure while spraying at a distance up to 200 feet (60 meters) from the sprayer.

With the sprayer powered on, pressurized, and the PowerShot XT paired to the sprayer, pressure increases and decreases each time the Remote Pressure Button is pressed while spraying, increment dependent on sprayer Pressure Mode:

- 50 psi (0.35 MPa, 3.5 bar) in High Pressure Mode
- 25 psi (0.17 MPa, 1.7 bar) in Low Pressure Mode

SmartStall™

SmartStall allows PowerShot XT to start and stop the motor upon Trigger pull and release to eliminate pressure pulsations and gun kickback.

Disable/Enable SmartStall™ (PowerShot XT only)

Upon first installation, the SmartDisplay XT will enable the XT sprayer to run with the SmartStall feature when paired with a Contractor PowerShot XT spray gun. A user may prefer to disable the SmartStall feature. To disable, follow the instructions below:

 Short press right menu button on SmartDisplay XT until "SMART STALL ON" begins to scroll across display.

2. Press and hold right menu button until "OFF" is displayed on the SmartDisplay XT.

NOTE: To re-enable SmartStall feature, follow steps 1 and 2 until "ON" is displayed on the SmartDisplay XT.

Unpair PowerShot XT from SmartDisplay XT

In some cases, it may be preferred to unpair the Contractor PowerShot XT spray gun from a SmartDisplay XT. This can be completed via the following steps:

- 1. Plug sprayer power cord into a properly grounded electrical outlet and turn ON/OFF switch to **ON** position.
- 2. Press menu button on display until "DISCONNECT SPRAY GUN" begins to scroll across screen.
- Press and hold menu button on "DIS-CONNECT SPRAY GUN" screen until "GUN DISCONNECTED" begins to scroll.

Spraying

Take a few moments prior to spraying and review these simple tips to ensure your spraying project is a success.

INJECTION OR SPLASH HAZARD

Unexpected gun operation can cause serious injury. To prevent serious injury:

 Do not use the gun near equipment or items that produce magnetic fields. Magnetic fields may actuate the Trigger.

Spray Tip Orientation

To avoid serious injury from skin injection, do not put your hand in front of the Spray Tip or Spray Tip Guard.

- 1. Engage the Trigger Lock.
- Adjust the Spray Tip Guard for the desired vertical or horizontal spraying direction.

Clear Tip Clogs

In the event that particles or debris clog the Spray Tip, this gun is designed with a reversible Spray Tip that quickly and easily clears the particles without disassembling the sprayer.

To avoid serious injury from skin injection, do not put your hand in front of the Spray Tip or Spray Tip Guard.

1. Engage Trigger Lock. Rotate Spray Tip to UNCLOG position. Disengage Trigger Lock. Trigger gun at waste area to clear clog.

NOTE: If Spray Tip is difficult to rotate when turning to the unclog position, perform **Pressure Relief Procedure**, page 9, then turn Prime/Spray valve to spray position and repeat step 1.

2. Engage Trigger Lock. Rotate Spray Tip back to spray position. Disengage Trigger Lock and continue spraying.

Cleanup

Cleanup

NOTICE

Failure to properly clean PowerShot after each use will result in hardened materials, damage to the PowerShot, and the warranty will no longer be valid. Do not store solvents other than mineral spirits in PowerShot. Always flush with Graco Pump Armor prior to storage.

NOTICE

To avoid damage, never immerse the PowerShot in water or other fluid.

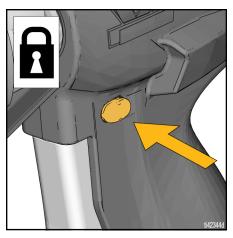

To avoid serious injury from fire and explosion when using oil-based or flammable materials:

- Clean in a well-ventilated area. Keep a good supply of fresh air moving through the area.
- When flushing with solvents, always ground the sprayer and waste container.

NOTE: Disengage WatchDog[™] when flushing system.

NOTE: Graco FastFlush[™] or TurboClean[™] will not function properly while using Contractor PowerShot guns. Instead, flush system using sufficient pressure in normal operating range. Use minimum pressure to prevent splashing during flushing

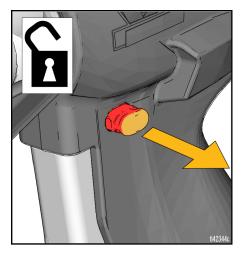

1. Engage Trigger Lock.

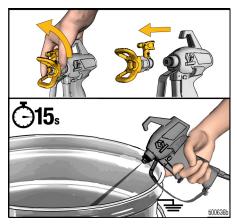

solvents through the Spray Tip. Remove Spray Tip and Spray Tip Guard, and clean in a bucket of compatible solvent.

- 2. Remove Spray Tip and Spray Tip Guard.
- 3. Disengage Trigger Lock.

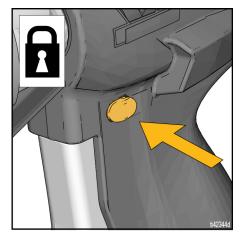

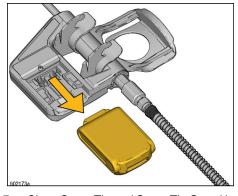

4. Point Spray Gun into a waste pail and trigger for 15 seconds to flush cleaning fluid through the PowerShot.

5. Engage Trigger Lock.

6. Remove Battery. Charge as needed.

- Clean Spray Tip and Spray Tip Guard in a bucket of compatible solvent. Reinstall Spray Tip and Spray Tip Guard.
- 8. Turn Spray Tip 90 degrees for storage.
- 9. Turn sprayer off.

Maintenance

Maintenance

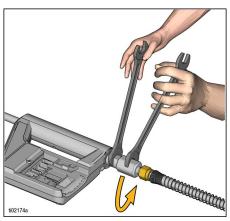

To avoid serious injury from skin injection, do not put your hand in front of the Spray Tip or Spray Tip Guard.

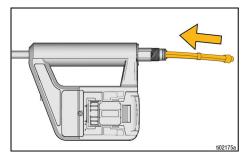

Clean/Replace Filter

A clogged filter reduces gun performance. Clean filter after each use.

- 1. Perform **Pressure Relief Procedure**, page 9.
- 2. Engage Trigger Lock.
- 3. Remove Battery from PowerPak.
- 4. Use two wrenches to loosen filter housing nut.

5. Remove and clean filter.

6. Replace filter and reinstall filter housing nut in opposite steps as removal.

Repair/Replacement

Repair/Replacement

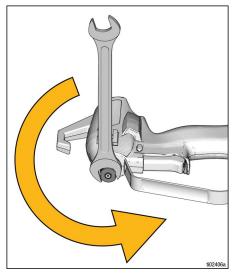

To avoid serious injury from skin injection, follow the **Pressure Relief Procedure** before servicing or replacing the gun.

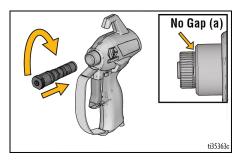

Replacing PowerShot ProConnect Cartridge

Replace PowerShot ProConnect Cartridge if the assembly is leaking or if there is a loss in spray performance that cannot be resolved by flushing the gun.

- 1. Perform **Pressure Relief Procedure**, page 9.
- 2. Engage Trigger Lock.
- 3. Remove Battery from PowerPak.
- 4. Remove Spray Tip and Spray Tip Guard from gun.
- 5. Unscrew Cartridge from front of gun using 5/8" wrench.

- 6. Use a soft brush and appropriate cleaner for material being sprayed to clean out internal passages of gun. Ensure no material remains in gun before inserting Cartridge.
- Install new Cartridge into the gun and torque to 100 in-lbs (11.3 N·m). There should be no gap in the indicated area below (a).

NOTE: Do not operate the gun if the Cartridge is not installed correctly.

8. Reinstall Spray Tip, Spray Tip Guard, and Battery.

Troubleshooting

Troubleshooting

Check everything in this Troubleshooting Table before you bring the spray gun to an authorized service center.

Problem	Cause	Solution
No material is sprayed	Spray Tip is not in SPRAY position.	Turn Spray Tip to SPRAY position.
when Trigger is pulled.	Spray Tip is clogged	See Clear Tip Clogs, page 17.
	Battery issue.	Install Battery or replace Battery.
	Debris stuck in Spray Gun.	See Clean/Replace Filter , page 20.
	Cartridge is not fully bottomed out.	Remove PowerShot ProConnect Cartridge from Spray Gun. Clean gun passage and Cartridge so there is no debris and parts are clean. Reassemble. Bottom out Cartridge and torque to 100 in-lbs (11.3 N·m).
	Electric wires disconnected.	Ensure electronic wire connectors are latched at both ends of the hose inside the Spray Gun and Battery Module.
	Cartridge is at end of life.	Replace Cartridge.
	Hose is plugged.	Replace Hose.
	Hose wires are damaged.	Replace Hose.
	Spray Gun has reached end of life.	Replace Spray Gun.
Gun will only spray a	Battery issue.	Install Battery or replace Battery.
quick pulse and not stay open.	Cartridge is not fully bottomed out.	Remove PowerShot ProConnect Cartridge from Spray Gun. Clean gun passage and Cartridge so there is no debris and parts are clean. Reassemble. Bottom out Cartridge and torque to 100 in-lbs (11.3 N·m).
Gun will spray at low pressure but not high pressure.	PowerShot ProConnect Cartridge is at end of life.	Replace Cartridge.

Troubleshooting

Problem	Cause	Solution
Poor spray results	Spray Tip is partially clogged.	See Clear Tip Clogs, page 17
	Spray Tip is not in correct position.	Rotate Spray Tip to SPRAY position.
	Spray Tip is worn or damaged.	Replace Spray Tip.
	Cartridge is not fully bottomed out.	Bottom out Cartridge and torque to 100 in-lbs (11.3 N·m).
	Depleted battery.	Recharge or replace battery.
	Material being sprayed is aerated because it was shaken.	Do NOT shake material. Stir the material or check the manufacturer's recommendation for the material being sprayed.
	Material being sprayed is too cold to spray.	Warm material.
	Material being sprayed is incompatible with sprayer.	Fully clean system, see Cleanup , page 18. Try thinning the material per manufacturer's recommendation, or switch to a different material.
	Gasket on front of Spray Gun is damaged or lost.	Replace gasket. See Parts List , page 27.
	Debris stuck in Spray Gun.	See Clean/Replace Filter , page 20.
	Poor/slow shutoff (debris stuck in spray gun).	See Advanced Troubleshooting (Debris Stuck in Spray Gun), page 24.
	Hose wires are damaged.	Replace Hose.
	Cartridge is at end of life.	Replace Cartridge.
	Spray Gun has reached end of life.	Replace Spray Gun.
Material leaks around	Tip Guard not tight enough.	Tighten Tip Guard with wrench.
Spray Tip Guard or Spray Tip handle	Spray Tip seal and seat are damaged or not properly installed.	See Spray Tip Installation , page 10.

Troubleshooting

Advanced Troubleshooting (Debris Stuck in Spray Gun)

High Flow Rapid Flush

- 1. Perform Cleanup, page 18.
- 2. Recommend moving to well-ventilated area or outdoors.
- 3. Prime sprayer with warm/hot water.
- 4. Engage Trigger Lock.
- 5. Remove Spray Tip from Spray Tip Guard.
- 6. Install Battery in PowerPak.
- 7. Point Spray Gun into waste pail, disengage Trigger Lock.
- 8. Slowly increase pressure on sprayer while rapidly triggering spray gun.

NOTE: Do not exceed 2000 psi or water may splash outside of sink/waste pail.

- Trigger Spray Gun rapidly approximately 10-15 times. Repeat if issue persists.
- 10. Engage Trigger Lock.
- 11. Replace Spray Tip in the Spray Tip Guard.

Recycling and Disposal

Recycling and Disposal

End of Product Life

At the end of the product's useful life, dismantle and recycle it in a responsible manner.

- Perform **Pressure Relief Procedure**, page 9.
- Drain and dispose of fluids according to applicable regulations. Refer to the material manufacturer's Safety Data Sheet.
- Remove motors, batteries, circuit boards, LCDs (liquid crystal displays), and other electronic components. Recycle according to applicable regulations.
- Do not dispose of electronic components with household or commercial waste.
- Deliver remaining product to a recycling facility.

Replacement Parts

Replacement Parts

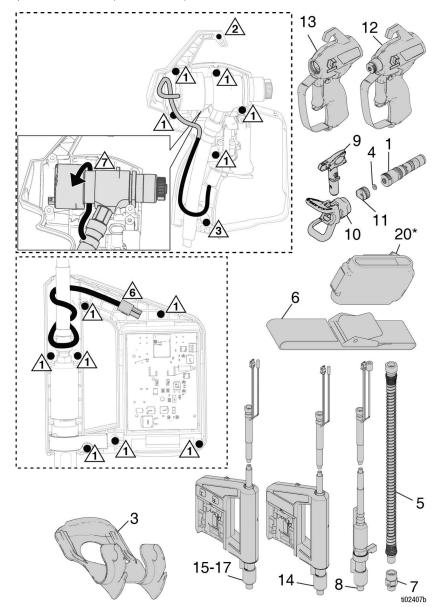

Torque to 14 ± 16 in-lbs (1.6 ± 1.8 N·m).

Wrap excess wire under and around F/N 1 ensuring that when swiveled the wires don't become tight.

Torque to 4 - 5 in-lbs (0.5 - 0.6 N·m).

Torque to 95 - 105 in-lbs (10.7 - 11.9 N·m).

Crient wires to exit the hose on the clamshell side of the gun.

Compliance

Compliance

Radio Frequency Approvals

The enclosed device complies with Part 15 of the FCC Rules and with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:(1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment is not granted protection against harmful interference and cannot cause interference on systems properly authorized.

Contains approved Multi-Protocol Module:

Contains FCC ID: 2ADHKWBZ451

Contains IC: 20266-WBZ451

with PowerPak	3.1 lbs	1.4 kg		
with PowerPak and Battery	3.9 lbs	1.8 kg		
Noise Level*				
Sound Power	92 dBa			
Sound Pressure	81 dBa			
Materials of Construction	·			
Wetted materials	stainless steel, aluminum, tungsten carbide, solvent resistant etastomer, PTFE, nylon, zinc and nickel plated carbon steel			

*Measured at 3.1 ft (1m) while spraying water-based paint, specific gravity 1.36, through a 517 tip at 3000 psi (207 bar, 20.7 MPa) per ISO 3744.

*Maximum initial battery voltage (measured without a workoad) is 20 volts. Nominal voltage is 18.

Damage to plastic parts may result if impact occurs in low temperature conditions.

 \checkmark Changes in paint viscosity at very low or very high temperatures can affect sprayer performance.

Graco Standard Warranty

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

FOR GRACO CANADA CUSTOMERS

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
